# Smart Warehouse & Inventory Management

Warehouses worldwide perform a variety of operations in multiple workflows at the same time, making it increasingly challenging to keep control over actions and resources resulting from poor layout and stock tracking, inaccurate manual records, high inventory carrying costs, accidents, wastage, and mismatched deliveries.

**Lack of digitization in the warehouse means loss of time, cost, and resources, with suboptimal operations and dissatisfied customers.**

Enterprises are fast adopting automation to streamline warehouse processes for accuracy and efficiency, saving costs, and ultimately improving client experience.

# NEC Mi-WareSync

## A Complete Out-of-the-Box Solution for End-to-end Warehouse Management

- Deployment models: on-premise / cloud / hybrid
- Multi-tenant capabilities
- Configurable workflow
- Multiple subscription models
- Custom tailored to business needs

## The Future of Modern Warehouse Management is here

NEC Mi-WareSync is a highly comprehensive system that offers all the features you need for optimum performance - now and in the future.

Enhanced  
inventory  
visibility

wastage

# NEC Mi-WareSync Optimizes Warehouse Operations End-to-end

Appointment Management, Pre-Receiving & Outbound, Inventory Management, Resource Management, and Integration Support

## Outbound

- Order & vehicle management
- Picking, Packing and Dispatch
- Kitting
- Wave management
- Material sorting
- Shipping management

## Configuration

- SKU/batch mixing
- Integration layer
- Inventory methods  
FIFO/FEFO/LIFO/FMFO
- Configurable putaway & picking algorithm
- Configurable UoM management
- Multilingual support

## Inbound

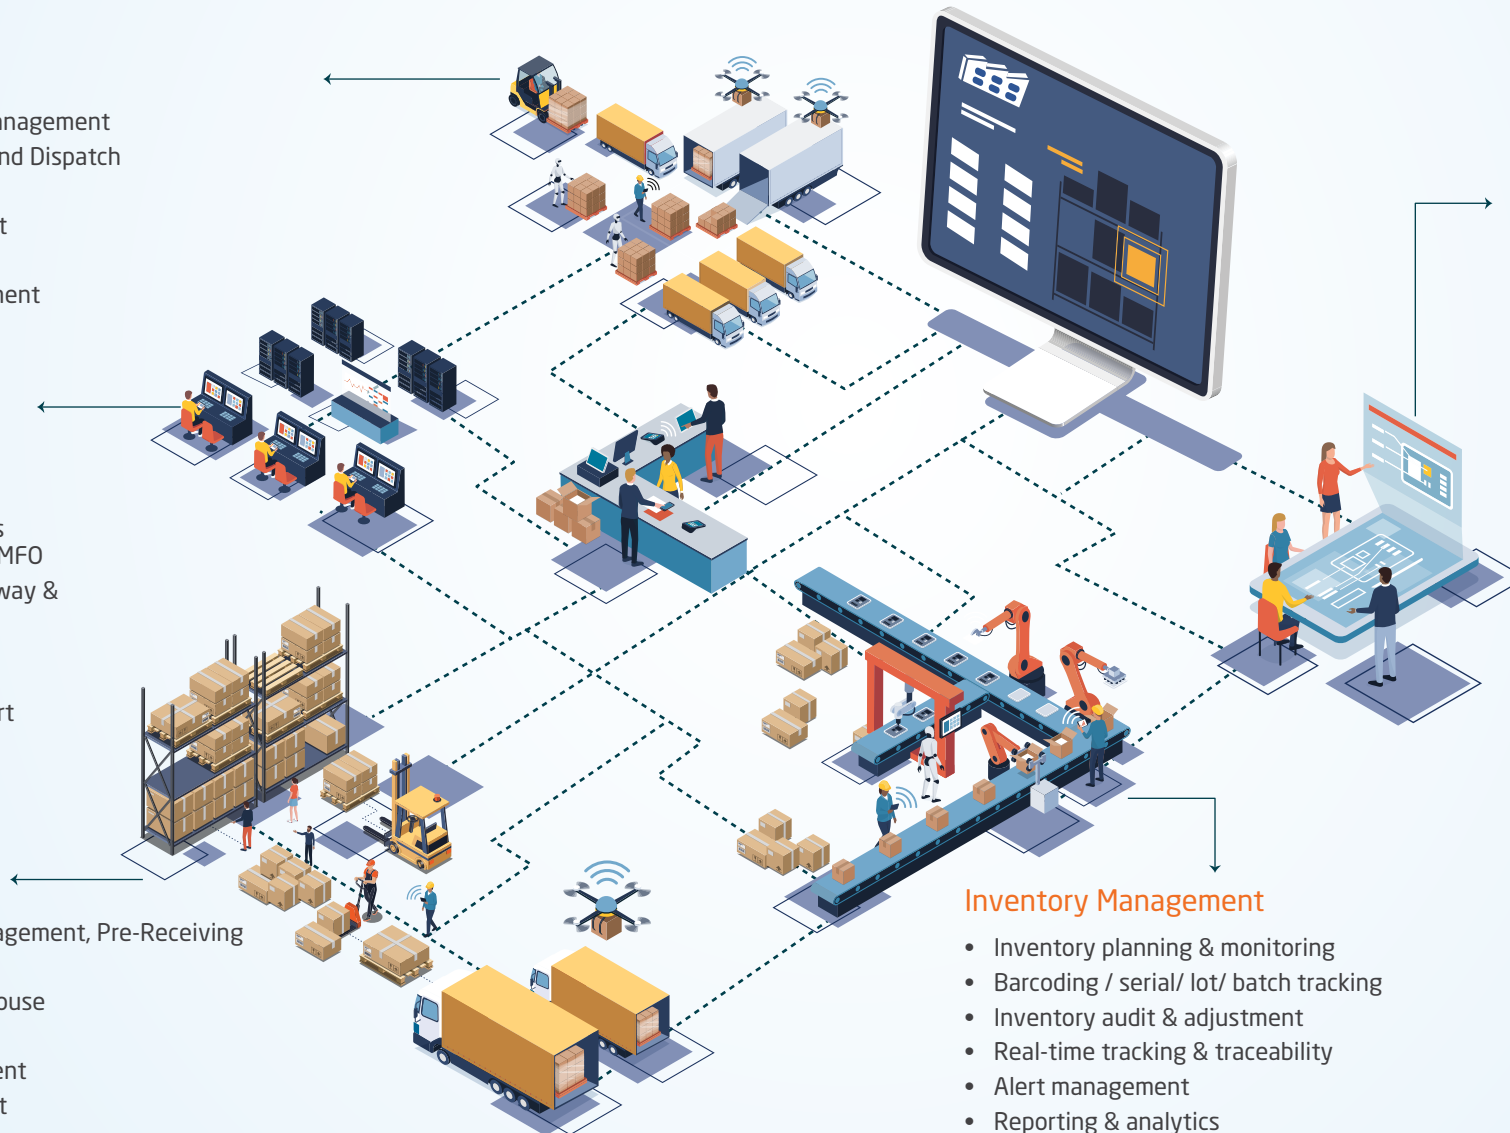

- Appointment Management, Pre-Receiving
- Receiving of items
- Putaway in warehouse
- Cross-docking
- Vehicle management
- Order management
- Quality audit

## Inventory Management

- Inventory planning & monitoring
- Barcoding / serial/ lot/ batch tracking
- Inventory audit & adjustment
- Real-time tracking & traceability
- Alert management
- Reporting & analytics

## Core

- Billing
- Access control
- User management
- Warehouse design
- BoM management
- HHT Application

# The NEC Mi-WareSync Advantage

NEC Mi-WareSync is designed to meet the needs of your business today and scale easily with future growth. With industry-specific capabilities to increase customer service and product velocity, NEC Mi-WareSync can be integrated with any ERP and offers a superior security ecosystem. Built on a cutting-edge platform for independence, reliability, scalability, and security.

## Wide Industry Coverage

Caters all industries like 3PL, Manufacturing, Automotive, Retail, FMCG, Electronics, Pharmaceutical, etc.

## Latest Technology Platform

Scalable, Cloud enabled microservice based architecture for easy & quick integration

## Low TCO

2X lower license and implementation costs compared to top WMS providers

## Highly Customizable

Tailormade to meet customer's specific business requirements

## Successful Global Deployments

Multiple deployments at different locations across the globe

## Flexible Deployment Strategies

On-premise, SaaS based along with different subscription models

## Best Suited For

Automotive

Manufacturing

Chemicals

Pharmaceuticals

Wholesale

3PL

Retail & E-commerce

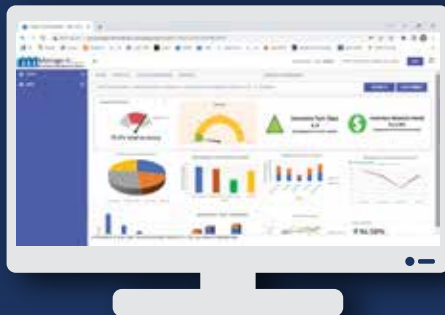

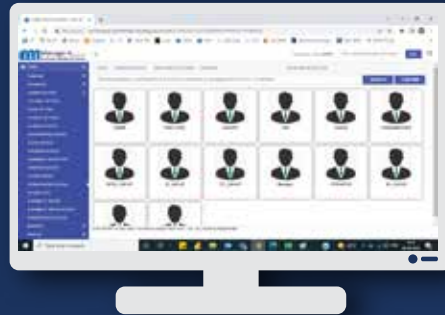

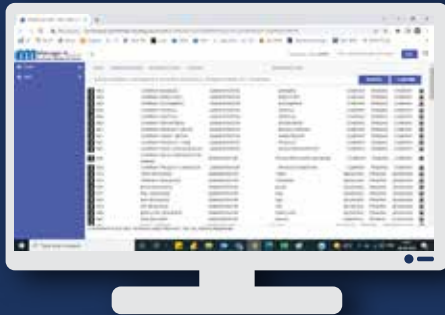

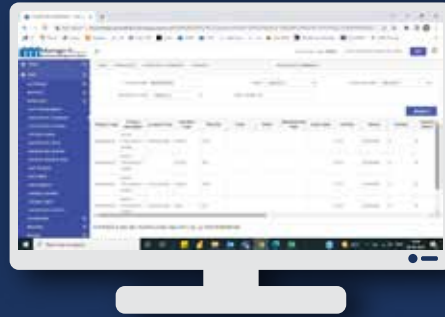

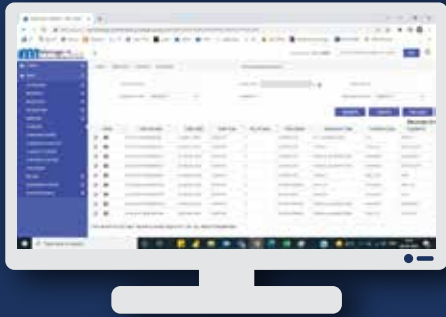

FMCG

Electronics
